WORK EXPERIENCE

04.2025 - 12.2025
(8 kuud)
Autlo OÜ Autlo OÜ Full-stack developer
Tehnoloogiad: React, Sass, TypeScript, Node.js, NPM, Express.js, Strapi, Puppeteer, Objection.js, Knex, OpenSearch, Tasker, Docker, Git, Gitea, Postman, Clockify, Slack, YouTrack
Daily work: I implemented updates to the Autlo parking API and the autlo.com website. I made changes across the entire stack, from Docker and the database to the user interface. The codebase was large and distributed across multiple repositories. I ensured the code was fast, compatible with the rest of the system, and followed the team's coding style. Communication took place through Slack, YouTrack tasks, and Git.

11.2023 – 01.2024
(2 months)
NoelCraft OÜ Wordpress developer
Technologies: WordPress, servers, DNS, WooCommerce, Breakdance.
Daily work: Designed and built a noelshop.eu website using WordPress and WooCommerce for a client in the fashion industry. Set up website hosting, server configuration, and DNS settings. Work was project based.

09.2021 – 06.2023
(1 year 9 months)
A.L.M. Automotive OÜ software developer
Technologies: WordPress, servers, DNS, Magento2, Vue Storefront, Vue3, Docker, Teams, Git, GitLab, Linux, Jenkins, social media management
Daily work: Convert an existing WordPress page (mapco.ee) into three pages using WP multisite. Adding translations, menus and other changes to pages. Making changes to a front-end Magento 2 page (autopartner24.ee) created using Vue Storefront. Magento 2 migration from one server to another.

03.2020 – 10.2020
(7 months)
Register OÜ front-end software developer
Technologies: HTML5, CSS3, JavaScript ES2021, jQuery, AJAX API, PHP7, Postman, WordPress, Git, SourceTree, Teams, Jira
Daily work: making updates to the ssb.ee page on Wordpress in Front-End and PHP. Constant communication with the designer, database developers and other team members.
